

INTRODUCING

IQ TAP

innovation

The high-tech beverage dispensing solution is the perfect blend of **style and innovation**, designed to transform your space and create an **exceptional guest experience**.

This is a statement of precision. This is IQ Tap.

It defines the beverage experience by delivering **flawless consistency** and **impeccable quality** with **no cross-mixing of flavors**. Every drink is fresh and pure, while seamlessly **aligning with ESG reporting standards**.

luxury

A masterpiece.

This IQ Tap is an innovative dispensing solution that combines **luxurious, modern design, state-of-the-art technology**, and wide functionality. It is built for **reliability and full control**.

1 Connectivity with **smart features**.

3 **Real-time, fully transparent data** insights into guest preferences, trends, environmental impact for maximum efficiency and profitability.

2 Fully integration-ready with **POS systems and access to control systems** for hotels.

4 **Flexible scheduling with full customization of beverage options**. Offerings can be **adjusted by time of day** (different juices for breakfast vs. for lunch or dinner). **Hydration options**, like plain or flavored water, can be available throughout the day, all managed automatically.

Every detail is designed for simplicity and personalization. **You can personalize it with your logo or custom design to showcase your unique identity.**

IQ Tap crafts **freshly mixed drinks in mere seconds** and offers a **customized selection of up to ten beverages**, including fresh juices, soft drinks, pure water, and pure soda water. Crystal-clear water and soda ensure that **every drink is perfectly clean and pure.**

Maintenance is effortless with **self-cleaning** functionality and a tap designed to keep juices at the **perfect temperature at all times**. It meets the **highest food safety standards** with an ergonomic, removable drip tray, ensuring **fresh, safe, and mess-free use**. Featuring uncompromising hygiene for pristine cleanliness and guest protection, the **advanced HPP Sanitation System ensures absolute safety**.

By embracing **circular economy principles**, the IQ Tap minimizes environmental impact and inspires eco-friendly hospitality.

- **Minimal energy use** and increased component **recyclability**.
- Designed in the EU to last, with fewer parts for easy upgrades and a **longer lifecycle**, minimizing waste and maximizing durability.
- Production processes **reduce emissions** and **support the community**.
- **Environmental footprint measurement** and reporting help you meet ESG reporting requirements.
- Made with **sustainable materials** and built to last, reducing the need for frequent replacements.

Where luxury meets innovation and sustainability moves forward.
This is more than just a beverage dispenser.
It's a trigger for the future of elegant hospitality and responsible design.

Contact us today and take the first step towards redefining your beverage experience.
